HEAT TREATMENT

The non-chemical alternative
for pest control

A LARGE PORTFOLIO OF HEATERS

Thermobile heaters are used all over the world in heat treatment processes for decontamination and pest control. Our portfolio offers a solution for a large series of applications as we have a large choice in capacity and design.

Be advised: our heaters allow both diesel as well as alternative fuels.
Visit www.thermobile.com for additional information.

Heat treatment, the non-chemical alternative for pest control. Thermobile Industries offers a wide range of products not only for comfortable space heating but also for non-toxic pest control.

BMSB TREATMENT

The brown marmorated stink bug (BMSB) is an agricultural pest damaging crops, fruits and ornamental trees. Australia and New Zealand are taking measures against the insects. One of the used methods against the BMSB is heat treatment. Heat treatment is a form of bio treatment and eliminates the use of toxic products.

Already several well-known companies are using our heating solutions to conduct a certified treatment of packaging wood, pallets and even cars and machines.

FIGHTING BED BUGS

Another application with our product like the TBD 18PC is "whole room heat treatment" to raise the temperature, in for example hotel rooms, to kill bed bugs. Bed bugs are a type of insect that feed on human blood, usually at night.

Bed bugs and eggs die within 90 minutes at 48°C or immediately at 50°C. Our powerful and easy to install mobile TBD 18PC electric air-heater is designed to withstand temperatures up to 70°C.

SPARE PARTS

Thermobile is manufacturer so spare parts are available and always within reach for a minimum of 10 years after the phase-out of a specific model. Making sure our clients heaters can be serviced at any time after purchase.

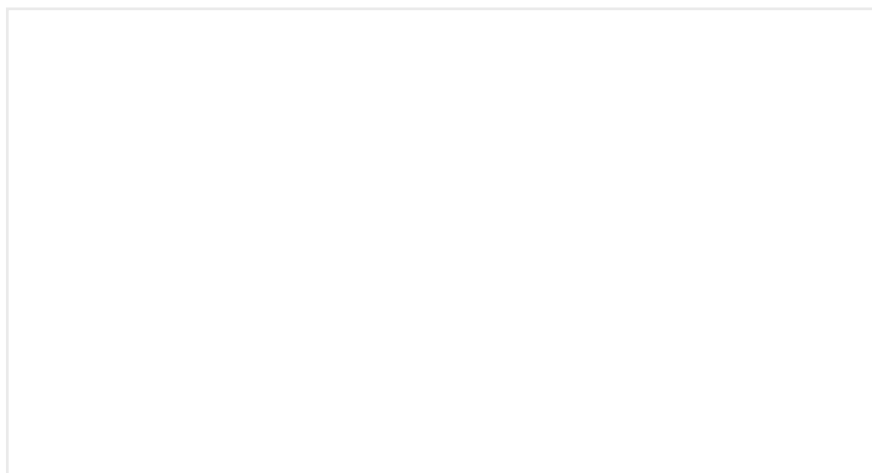

MANUFACTURING

We have a highly qualified and skilled team of technicians that is able to develop and produce according to the demand of the customer. All heaters are tested according to the strict norms we uphold.

SERVICE AND LOGISTICS

Our experienced logistics team will make sure our clients heaters will arrive, safe and sound, on-site and on time. Any after-care that the client might need is serviced by our team of engineers.
